INDEX

ACID, penetration of, into living cells, 526.

Action currents from the stomach, 612.

ADOLPH, E. F. assisted by W. B. FULTON. The effects of exposure to high temperatures upon the circulation in man, 573.

Air concussion, physiological effects of, 219.

Alcohol, effect of, on blood sugar of rabbits, 346.

Alkali, penetration of, into living cells, 526.

ALLAN, F. N. The glucose equivalent of insulin in depancreated dogs, 275.

Almond proteins and almond oil, biological value of, 173.

Amoebocyte tissue, protective mechanisms in, 526.

Anemia, cerebral, epinephrin output during, 551.

——, temporary, effects of, on blood vessel tone, 474.

——, ——, of kidneys, anuria following, 153.

Antineuritic value of hog muscle, 300.

Anuria following temporary anemia of the kidneys, 153.

Apnea, vagus, 309.

ASHBY, J. S. IV. An insulin-like substance in the kidney, spleen and skeletal muscle, 77.

BALDERREY, F. C. See BARKUS and BALDERREY, 608.

BARBOUR, H. G. Heat regulation and water exchange. I. The effects of hot and cold baths upon blood concentration and brain volume in dogs, 366.

—— and W. BOURNE. Heat regulation and water exchange. IV. The influence of ether in dogs, 399.

BARBOUR, H. G. and E. TOLSTOI. Heat regulation and water exchange. II. The rôle of the water content of the blood, and its control by the central nervous system, 378.

BARKUS, O. and F. C. BALDERREY. The effect of radiant energy on the excretion of parenterally introduced simple salts, 608.

BLATHERWICK, N. R., L. C. MAXWELL and M. L. LONG. The effect of the oral administration of alcohol upon the blood sugar of rabbits, 346.

Blood concentration in dogs, effects of hot and cold baths on, 366.

—— —— of dogs, effects of dry and moist heat upon, 388.

—— counts, factors causing quick changes in, 291.

——, rôle of water content of, and its control by the central nervous system, 378.

—— sugar, normal, of pigeons, 317.

—— —— of pigeons, effect of inactivity on, 333.

—— —— of pigeons, effects of cold on, 337.

—— —— of rabbits, effect of alcohol on, 346.

——, ——, relation to thyroid and suprarenal size, 539.

—— vessel tone, effects of temporary anemia on, 474.

BLUEMEL, C. S. and R. LEWIS. Effect of intravenous saline solution on the leucocyte count, 464.

BLUMENSTOCK, J. and A. B. LUCKHARDT. The effect of intravenously injected saline solutions on the volume excretion and nitrogen elimination by the kidneys, 514.

BODANSKY, M. Comparative studies of digestion. III. Further observations on digestion in coelenterates, 547.

Bostrom, E. F. Studies on factors producing a rapid increase or decrease in the number of red and white cells in the blood stream. I. Acids and bases, 291.
Bourne, W. See Barbour and Bourne, 399.
Boyd, T. E. See Robins and Boyd, 166.
Brain volume in dogs, effects of hot and cold baths on, 366.
Bridge, E. See Morgan, Newbecker and Bridge, 173.
Britton, S. W. The effects of extreme temperatures on fishes, 411.
Bulatao, E., N. B. Laughton and A. J. Carlson. The effects of temporary anemia on the tone of the blood vessels, 474.

CARDIAC records in man, 203.
Cardio-vascular conditions, daily variations in, 193.
Carlson, A. J. See Bulatao, Laughton and Carlson, 474.
——. See Pearcy and Carlson, 162.
——. See Stoll and Carlson, 153.
Carr, R. H. See Pollard and Carr, 589.
Casein, special reference to, in protein fevers, 105.
Cells, living, penetration of acid and alkali into, 526.
Cerebral anemia, epinephrin output during, 551.
Cereal values in egg production, 589.
Circulation, effects of heat on, 573.
Coelenterates, digestion in, 547.
Cold weather, effects of, on blood sugar and ovulation rate in pigeons, 337.
Concussion, air, physiological effects of, 219.
Cooper, E. The distribution of vitamine A in urine and some of the digestive secretions, 454.
Cooper, E. F. See Dragstedt and Cooper, 48.
Cryptorchidism, experimental, 595.

DEFICIENCY diseases, parabiosis in study of, 48.
Digestion, comparative studies of, 547.
Digestive secretions, vitamin A in, 454.
Diseases of pigeons, relation of normal blood sugar to, 317.
Donaldson, H. H. On changes in the relative weights of the viscera and other organs from birth to maturity —albino rat, 1.
Dragstedt, L. R. and E. F. Cooper. Parabiosis in the study of deficiency diseases, 48.

EDEMA, hereditary factors in production of, 467.
Egg production, cereal values in, 589.
Energy, radiant, visibility of, 348.
Epinephrin output during cerebral anemia, 551.
Ether, influence of, on heat and water exchange, 399.

FEVER-PRODUCING substance in some distilled waters, 90.
Fevers, protein, 105.
Fisher, N. F. Attempts to maintain the life of totally pancreatectomized dogs indefinitely by insulin, 634.
——. I. Preparation of insulin, 57.
——. II. The absorption of insulin from the intestine, vagina and scrotal sac, 65.
—— and B. E. Noble. III. Excretion of insulin by the kidneys, 72.
——. See Ivy and Fisher, 445.
Food tests, biological, 173.
Fulton, W. B. See Adolph and Fulton, 573.

GASOMETER method, determination of heat production by, 487.
Gastric secretion, excitation of, by application of substances to duodenal and jejunal mucosa, 124.
—— ——, relation of insulin-like substance in gastro-intestinal mucosa to, 445.
Gastrin, presence of, in human gastro-intestinal mucosa, 451.
Gastro-intestinal mucosa, human, presence of gastrin in, 451.
—— ——, insulin-like substance in, 445.
Gilman, E. See Loeb and Gilman, 526.

Glucose equivalent of insulin in depancreated dogs, 275.
—— output in perfused terrapin liver, 22.

HAMMETT, F. S. Studies of the thyroid apparatus. XVIII. The differential development of the albino rat from 100 to 150 days of age and the influence of thyro-parathyroidectomy and parathyroidectomy thereon, 29.
Heat, dry and moist, effects of, on body temperature and blood concentration of dogs, 388.
——, effects of, on circulation in man, 573.
—— production, determination of, by gasometer method, 487.
—— regulation and water exchange, 366, 378, 388, 399.
Heidenhain pouch movements, rhythm of, and their reflex modifications, 166.
HEJINIAN, L. M. The possible hereditary factors in experimental production of edema and xerophthalmia, 467.
Hereditary factors in edema and xerophthalmia, 467.
HOAGLAND, R. Antineuritic value of hog muscle, 300.
HONEYWELL, H. E. See RIDDLE and HONEYWELL, 317, 333, 337.
——. See RIDDLE, HONEYWELL and SPANNUTH, 539.
HOOKER, D. R. Physiological effects of air concussion, 219.

INSOMNIA, experimental, functional changes in nervous system during, 141.
Insulin, absorption of, from intestine, vagina and scrotal sac, 65.
——, excretion of, by kidneys, 72.
——, glucose equivalent of, in depancreated dogs, 275.
——, maintenance of life by, after pancreatectomy, 634.
——, preparation of, 57.
Insulin-like substance in gastric and duodenal mucosa, 445.
Insulin-like substance in kidney, spleen and skeletal muscle, 77.
Intravenous saline solution, effect of, on leucocyte count, 464.
—— —— ——, effect of, on renal function, 514.
IVY, A. C. and N. F. FISHER. The presence of an insulin-like substance in gastric and duodena mucosa and its relation to gastric secretion, 445.
—— and G. B. MCILVAIN. The excitation of gastric secretion by application of substances to the duodenal and jejunal mucosa, 124.
—— and H. A. OBERHELMAN. The presence of "gastrin" in human postmortem pyloric and duodenal mucosa, 451.

KIDNEY function, effect of intravenous saline solutions on, 514.
Kidneys, anuria following temporary anemia of, 153.
——, excretion of insulin by, 72.
KITCHEN, H. D. Determination of the heat production in dogs by the gasometer method, 487.
KLEITMAN, N. See LEE and KLEITMAN, 141.

LAUGHTON, N. B. See BULATAO, LAUGHTON and CARLSON, 474.
LAURENS, H. Studies on the relative physiological value of spectral lights. IV. The visibility of radiant energy, 348.
LEE, F. C. Some observations on lymph-pressure, 498.
LEE, M. A. M. and N. KLEITMAN. Studies on the physiology of sleep. II. Attempts to demonstrate functional changes in the nervous system during experimental insomnia, 141.
Leucocyte count, effect of intravenous saline solution on, 464.
LEWIS, R. See BLUEMEL and LEWIS, 464.
Lights, spectral, relative physiological value of, 348.
Liver, perfused terrapin, glucose output in, 22.

Loeb, L. and E. Gilman. On the penetration and acid and alkali into living cells and on a protective mechanism operative in cultures of amoebocyte tissue, 526.
Long, M. L. See Blatherwick, Maxwell and Long, 346.
Lozinsky, E. Heat regulation and water exchange. III. The effects of "dry" and "moist" heat upon the body temperature and blood concentration of dogs, 388.
Luckhardt, A. B. See Blumenstock and Luckhardt, 514.
Lung, isolated, of turtle, motor rhythm in, 162.
Lymph-pressure, 498.

McIlvain, G. B. See Ivy and McIlvain, 124.
